

UMA MSSP ACO (PACS) Tip of the Week “Influenza and Pneumonia Immunization”

Background

In order to improve the safety of our patients, all should receive an influenza vaccine 10/1/2016 – 12/31/2016.

All patients over age 65 should receive a pneumococcal vaccination at least once.

NOTE: This measure must be reported on a yearly basis

How Do I Do This?

Administer the vaccines and Document in the medical record which were given.
